## **Abstracts**

Security services focus on the security of key parameters such as data protection, compliance, architecture, email and web security, governance, data loss prevention, and identity and access. They provide features such as encryption, endpoint monitoring, identity and access management, intrusion detection, vulnerability scanning, and application and messaging security. They are gaining importance among large enterprises, government organizations, and SMEs because they provide protection to critical business information from unauthorized access and data theft.

### **SCOPE OF THE REPORT:**

This report studies the Security Services market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Security Services market by product type and applications/end industries.

Security services have been deployed across verticals, including, Banking, Financial Services, and Insurance (BFSI), government and defense; telecom and IT, retail, healthcare, energy and utilities, manufacturing, and others (education, media and entertainment, and automotive). The BFSI vertical is estimated to have the largest market size in 2018, due to the growing use of web and mobile applications for banking transactions and payments.
