Abstracts

The global Seed Cryogenic Storage Cabinet market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The low-temperature and low-humidity seed storage cabinet can control the temperature, humidity and other environmental factors of seed storage, creating a low-temperature and low-humidity environment for seed storage. The low-temperature conditions can reduce the respiration of seeds and preserve the organic matter in the seeds. The low-humidity environment can reduce the water content. , greatly reducing the proportion of free water, slowing down the metabolism of seeds, and conducive to the preservation of seed nutrients.
