According to our (Global Info Research) latest study, the global Segmented Tire Mold market size was valued at USD 1384.2 million in 2023 and is forecast to a readjusted size of USD 1800.5 million by 2030 with a CAGR of 3.8% during review period.

A segmented tire mold having two sidewalls, a plurality of radially movable segments and a pair of internally conical casing rings cooperable with the segments to close the mold as the rings are urged coaxially together in a pot heater. A fixture cooperates with the mold to facilitate assembling or disassembling the mold. In the fixture, the casing rings can be moved axially away from the respective sidewalls and from each other, freeing the segments to be moved outwardly by individual screw jacks operated by a common motor.

In 2022, global tire sales reached 1.749 billion units, of which the three major markets of Europe, North America and China will collectively sell 1.14 billion units, accounting for 65% of the total. China is the world's largest tire producer and exporter. Among the top 75 tire companies in 2022 released by Tire Business, 34 are Chinese companies (including 5 from Taiwan), with a total sale of approximately US\$ 34.5 billion, accounting for approximately 19.42% of the total global sales. According to data from the National Bureau of Statistics, by the end of December 2022, the output of rubber tire casings in China was about 856 million.
