According to our (Global Info Research) latest study, the global Seismic Base Isolation System market size was valued at USD 399 million in 2023 and is forecast to a readjusted size of USD 522.4 million by 2030 with a CAGR of 3.9% during review period.

Seismic base isolation system is the system used to reduce the effects of earthquake ground shaking on structure, their components and protect them from damaging. The system decouples the building or structure from the horizontal components of the ground motion by interposing structural elements with low horizontal stiffness between the structure and the foundation. This gives the structure a fundamental frequency that is much lower than both its fixed-base frequency and the predominant frequencies of the ground motion.

Global core seismic base isolation system manufacturers include Yunnan Quakesafe Seismic, OILES CORPORATION and Kawakin Holdings etc. The top 3 companies hold a share about 40%. The major market of seismic base isolation system is Asia-Pacific, which accounting for about 85% of market share in total.
