According to our (Global Info Research) latest study, the global Seismic Isolation Floor Systems market size was valued at USD 369.4 million in 2023 and is forecast to a readjusted size of USD 483.6 million by 2030 with a CAGR of 3.9% during review period.

This report studies the Seismic Isolation Systems market, Seismic Isolation Systems is the system used to reduce the effects of earthquake ground shaking on structure, their components and protect them from damaging. The system decouples the building or structure from the horizontal components of the ground motion by interposing structural elements with low horizontal stiffness between the structure and the foundation. This gives the structure a fundamental frequency that is much lower than both its fixed-base frequency and the predominant frequencies of the ground motion.

Global Seismic Isolation Systems key players include Yunnan Quakesafe Seismic, OILES CORPORATION, Nippon Steel Engineering, SWCC SHOWA, etc. Global top four manufacturers hold a share over 50%.

Japan is the largest market, with a share about 35%, followed by Europe and China, both have a share over 45 percent.

In terms of product, LRB is the largest segment, with a share about 55%. And in terms of application, the largest application is Commercial Buildings, followed by Residential Buildings, etc.
