## Abstracts

According to our (Global Info Research) latest study, the global Seismic Isolation System market size was valued at US\$ 485 million in 2024 and is forecast to a readjusted size of USD 621 million by 2031 with a CAGR of 3.6% during review period.

This report studies the seismic isolation system market. Seismic isolation system is the system used to reduce the effects of earthquake ground shaking on structure, their components and protect them from damaging. The system decouples the building or structure from the horizontal components of the ground motion by interposing structural elements with low horizontal stiffness between the structure and the foundation. This gives the structure a fundamental frequency that is much lower than both its fixed-base frequency and the predominant frequencies of the ground motion.

Global key players of Seismic Isolation System include Yunnan Quakesafe Seismic, OILES CORPORATION, Kawakin Holdings, Nippon Steel Engineering, SWCC SHOWA, etc. The top five players hold a share about 50%. Asia-Pacific is the largest market, and has a share about 86%, followed by Europe and North America with share 6% and 5%, separately. In terms of product type, LRB is the largest segment, occupied for a share of 43%. In terms of application, Commercial Buildings have a share about 83 percent.
