According to our (Global Info Research) latest study, the global Self Consolidating High Performance Concrete market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Self-consolidating concrete (SCC) is a highly flowable, nonsegregating concrete that can spread into place, fill the formwork, and encapsulate the reinforcement without any mechanical consolidation. SCC is made with conventional concrete materials and, in some cases, with a viscosity-modifying admixture (VMA). SCC has a low yield stress, high deformability, good segregation resistance, and moderate viscosity². SCC is recognized as one of the greatest advances in the concrete industry.
