According to our (Global Info Research) latest study, the global Self-Operated Differential Pressure Regulating Valve market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

The self-operated differential pressure regulating valve does not require external energy, and relies on the pressure change of the regulated medium to automatically adjust, automatically eliminates the remaining pressure head of the pipe network and the flow change caused by pressure fluctuations, and keeps the user's inlet and outlet pressure differences, which helps to stabilize the system. It is especially suitable for household metering or automatic control systems.
