The global Self-Operated Differential Pressure Regulating Valve market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The self-operated differential pressure regulating valve does not require external energy, and relies on the pressure change of the regulated medium to automatically adjust, automatically eliminates the remaining pressure head of the pipe network and the flow change caused by pressure fluctuations, and keeps the user's inlet and outlet pressure differences, which helps to stabilize the system. It is especially suitable for household metering or automatic control systems.
