## Abstracts

According to our (Global Info Research) latest study, the global Self-tanning Products market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Self-tanning products usually contain dihydroxyacetone (DHA). After application, these products chemically combine with the outer layer of the skin to give the impression of a suntan. Getting a natural tan from outdoor treatments can be time-consuming, discomforting, and temporary. Therefore, self-tanning products are gaining traction across the globe.

This report is a detailed and comprehensive analysis for global Self-tanning Products market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2023, are provided.
