## Abstracts

The global Semen Ginkgo Extract market size is expected to reach \$ 33.72 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032). In 2025, the global production of Semen Ginkgo Extract is estimated at approximately 860 tons, with an average selling price of about US\$28 per kilogram. The production capacity in 2025 is 1140 tons, with an average gross profit margin of approximately 20-30%. Semen Ginkgo Extract is a substance extracted from the seeds of the Ginkgo biloba plant, also known as Ginkgo fruit extract. It contains cyanogenic glycosides, gibberellins, amino acids, and minerals such as calcium and phosphorus. The outer seed coat contains toxic components such as ginkgolic acid and hydrogenated ginkgolic acid. It is widely used in the pharmaceutical and health product industries.

The core upstream raw material for Semen Ginkgo Extract is Ginkgo leaves that meet quality standards. Their quality is directly affected by the origin, harvesting time, and cultivation practices. Downstream applications are extensive, mainly covering health products and dietary supplements (used to improve cardiovascular and cerebrovascular circulation and cognitive health), the pharmaceutical field (as a prescription drug or raw material for preparations, such as for treating symptoms related to dementia), the cosmetics industry (added to skincare products as an antioxidant and anti-aging active ingredient), and functional foods and beverages.

Semen Ginkgo Extract, primarily derived from ginkgo leaves, is a natural plant extract widely used in health supplements, pharmaceuticals, cosmetics, and food additives. With increasing global health awareness and the rise of aging societies, the market demand for Semen Ginkgo Extract continues to grow. Particularly in the areas of brain health, cardiovascular disease, and anti-aging, ginkgo biloba extract has attracted attention due to its unique medicinal value. According to market research, China is the world's largest producer and consumer market for Semen Ginkgo extract, accounting for a major share of global supply, while demand in the European and North American

markets is also steadily increasing.

As consumers demand more natural and harmless health products, Semen Ginkgo Extract, as a natural ingredient of plant origin, has gradually replaced synthetic chemicals, becoming a new favorite in the market. Ginkgo biloba extract is particularly widely used in the health supplement field, often found in functional products aimed at improving memory, enhancing blood circulation, and anti-aging. In the pharmaceutical field, it is used in medications for treating Alzheimer's disease and improving blood circulation. The cosmetics industry is also increasingly adopting ginkgo biloba extract, mainly in anti-aging and antioxidant skincare products.

Furthermore, with technological advancements, the extraction process of Semen Ginkgo Extract is continuously optimized, improving its quality and stability, providing better guarantees for its application in various industries. It is expected that the global Semen Ginkgo Extract market will continue to grow in the coming years, especially in the Asia-Pacific region, where the rise of the health industry presents significant market potential for Semen Ginkgo Extract.
