## Abstracts

The global Semi-automatic Aerosol Filling Machine market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The aerosol filling machine is specially used for the production of aerosol products. Due to the special reason of pressure in aerosol products, filling is divided into. The liquid filling machine pours a quantitative amount of liquid into the aerosol can under normal temperature and pressure. The gas filling machine pours a quantitative amount of gas with a certain pressure ( or liquefied gas) into the aerosol can. And because the aerosol product must have a certain pressure, the mouth of the aerosol can must be closed before inflating. The filling machine fills the air through the valve on the top of the aerosol can.
