Abstracts

According to our (Global Info Research) latest study, the global Semi-integrated Solar Street Light market size was valued at US\$ 899 million in 2025 and is forecast to a readjusted size of US\$ 1328 million by 2032 with a CAGR of 6.0% during review period.

In 2025, global Semi-integrated Solar Street Light production reached approximately 2,130 k units with an average global market price of around US\$ 410 per unit, and a gross profit margin of approximately 20%-40%. Semi-integrated Solar Street Lights are outdoor solar lighting systems that integrate key components such as LED lamps, batteries, controllers, sensors, and control circuits into one or partially combined structure, while the solar panel may remain separated or adjustable for better sunlight capture. These products are widely used in roads, rural areas, residential communities, industrial parks, parking lots, campuses, gardens, public squares, farms, and off-grid lighting projects. Compared with fully split solar street lights, semi-integrated designs reduce installation complexity and wiring work; compared with all-in-one designs, they provide better flexibility in solar panel orientation and maintenance. The industrial chain of Semi-integrated Solar Street Lights includes upstream solar panels, LED chips, lithium batteries, charge controllers, sensors, aluminum housings, brackets, poles, lenses, cables, PCBs, fasteners, waterproof seals, and packaging materials. The midstream includes product design, lighting module integration, battery management, solar charging system matching, optical design, structural assembly, waterproof testing, aging tests, quality control, and certification. Downstream applications include municipal roads, rural roads, residential areas, industrial parks, commercial zones, schools, parks, scenic areas, parking lots, and off-grid infrastructure projects. Related services include lighting design, installation guidance, project commissioning, maintenance, battery replacement, spare parts supply, and after-sales support.
