Semi-rigid food vacuum machine is a kind of equipment used for food packaging. It is mainly used to put food into semi-rigid packaging bags, and then extract the air in the bag to form a vacuum environment to extend the shelf life and freshness of the food. For meat products such as beef, mutton, pork, etc., semi-rigid food vacuum machine can effectively extend their shelf life. By putting meat into semi-rigid packaging bags and extracting the air in the bag, the meat can be prevented from oxidation and deterioration, and its freshness and taste can be maintained. In addition, vacuum packaging can also prevent meat from being contaminated by bacteria and mold, and improve food safety. Seafood products are easy to deteriorate. Semi-rigid food vacuum machine can put seafood into semi-rigid packaging bags, extract the air in the bag, prevent seafood from oxidation and deterioration, and extend its shelf life. At the same time, vacuum packaging can also prevent seafood from being contaminated by bacteria and mold, and maintain its freshness and taste.
