## Abstracts

According to our (Global Info Research) latest study, the global Semi-Static Ropes market size was valued at USD 157.9 million in 2022 and is forecast to a readjusted size of USD 244 million by 2029 with a CAGR of 6.4% during review period.

The semi-static ropes are designed to be used as a means of progression, to be ascended and descended comfortably. They also offer a minimum degree of safety in falls up to factor 1. The person who uses this type of rope must always be situated below the rope anchor point. Semi-static ropes are ideal for use in caves, with their low stretch perfect for SRT.

In rock climbing and caving, ropes are a major part. Climbing ropes are connected via splices, secured to a wall or rock, and attached to the climber. The global market is rapidly expanding owing to the use of climbing ropes in gyms, increase in outdoor sports, and rock climbing and caving as a sporting activity. The rising awareness about the health benefits of rock climbing ropes is one of the good reasons for increasing the demand for rock climbing ropes. The increase in tourism activities mainly accelerates market demand.
