The global Semiconductor FOUP and FOSB market size is expected to reach \$ 1177.5 million by 2029, rising at a market growth of 6.7% CAGR during the forecast period (2023-2029).

The major manufacturers of global semiconductor FOUP and FOSB wafer cassettes are Entegris, Shin-Etsu Polymer, Miraial, Chuang King Enterprise, Gudeng Precision, 3S Korea, Dainichi Shoji, etc. The top three manufacturers together occupy more than 85% of the market share, of which the largest producer is Entegris, with a market share of 54.08%. Global semiconductor FOUP and FOSB wafer box production regions are mainly located in North America, Japan and Taiwan (China), etc. The top three regions occupy more than 95% of the market share. In terms of their product categories, In-process wafer transport boxes(FOUP) have a higher market share of 73.55%, while shipment wafer transport boxe(FOSB) account for a lower share. In terms of its applications, 300mm wafers are its top application area with a 97.91% market share, while 200mm wafers account for a lower share.

Semiconductor FOUP and FOSB are the containers to transfer the wafers safely. The Semiconductor FOUP and FOSB can be opened and closed with the help of robot to support the existing automation in the wafer transport and shipping. The Semiconductor FOUP and FOSB must comply with the semiconductor industry standards such as M31, E15.1, E57, E62 and others. The wafer transport box is so designed that it increases the wafer position accuracy along with its operability. The wafer transport box offers removable gasket that provides protection for external contamination. The wafer shipping boxes, or wafer transport box are packaged in horizontal wafer shippers and vertical wafer shippers. The advanced Semiconductor FOUP and FOSB offer benefits over the traditional mid-range and low range wafer carriers. Some of them include

precise wafer access, reliable equipment operation with automated handling systems and secured wafer protection against damage and contamination.

This report studies the global Semiconductor FOUP and FOSB production, demand, key manufacturers, and key regions.
