Abstracts

According to our (Global Info Research) latest study, the global Semiconductor Grade High-Purity Ammonia market size was valued at US\$ 164 million in 2024 and is forecast to a readjusted size of USD 255 million by 2031 with a CAGR of 6.6% during review period.

Electronic grade high-purity ammonia can usually be divided into three types based on purity: 99.999% (5N), 99.9999% (6N), and 99.99999% (7N, i.e. ultra pure). In specific applications, there are significant differences in the requirements for electronic grade high-purity ammonia used in different processes. Generally speaking, the requirements for the electronic grade high-purity ammonia required for solar cell production are relatively low, and electronic grade high-purity ammonia with a purity of 99.9995% is commonly used in China. The foreign solar cell industry uses 99.9994% of electronic grade high-purity ammonia more frequently. The requirements for electronic grade high-purity ammonia used in light-emitting diodes (LEDs), integrated circuits (ICs), and liquid crystal displays (LCDs) are relatively high, with some fields requiring 99.9999% (7N) of electronic grade high-purity ammonia.

Following a strong growth of 26.2 percent in the year 2021, WSTS revised it down to a single digit growth for the worldwide semiconductor market in 2022 with a total size of US\$580 billion, up 4.4 percent. WSTS lowered growth estimation as inflation rises and end markets seeing weaker demand, especially those exposed to consumer spending. While some major categories are still double-digit year-over-year growth in 2022, led by Analog with 20.8 percent, Sensors with 16.3 percent, and Logic with 14.5 percent growth. Memory declined with 12.6 percent year over year. In 2022, all geographical regions showed double-digit growth except Asia Pacific. The largest region, Asia

Pacific, declined 2.0 percent. Sales in the Americas were US\$142.1 billion, up 17.0% year-on-year, sales in Europe were US\$53.8 billion, up 12.6% year-on-year, and sales in Japan were US\$48.1 billion, up 10.0% year-on-year. However, sales in the largest Asia-Pacific region were US\$336.2 billion, down 2.33% year-on-year.
