Abstracts

According to our (Global Info Research) latest study, the global Semiconductor Sealing Products market size was valued at USD 406.5 million in 2023 and is forecast to a readjusted size of USD 768.4 million by 2030 with a CAGR of 9.5% during review period.

Semiconductor manufacturing comes with its own unique sets of challenges, one of the biggest being sealing against microscopic particles. As with many manufacturing processes, contamination is one of the biggest enemies of sealing performance. In standard industrial sealing applications, contamination will be measured in millimetres, but in the semiconductor industry, it's measured in microns. Semiconductor seals are used to avoid contaminations by reducing particulates, lowering extractable, and resisting degradation in harsh plasma.

This report mainly studies O-rings used in semiconductor industry. O-Ring, the cutting edge is a 'O' shape, which is the most common, classic, economical and useful sealing type in both dynamic and static application.

Note: China in this report includes China Taiwan.

Global key players of semiconductor sealing products include Dupont, NOK CORPORATION, Eagle Industry, etc. Asia-Pacific is the largest producer of semiconductor sealing products, holds a share over 50%, followed by North America, and Europe.
