According to our (Global Info Research) latest study, the global Semiconductor Silicone Rubber Test Socket market size was valued at US\$ 225 million in 2025 and is forecast to a readjusted size of US\$ 348 million by 2032 with a CAGR of 6.5% during review period.

The silicone rubber socket is a kind of the elastomer test sockets consisting of metal powders in the elastomer material. The noncoaxial silicone rubber socket may have the limited electrical performances due to its pitch. Because the pitch is determined by the package's footprint. Silicone rubber socket is a promising test socket that can be adopted in high-speed testing environments in place of pogo type sockets, due to it relatively shorter length and lower inductance.
