Scope of the Report:

This report focuses on the Semiconductor Wafer Polishing Equipments in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Foundries are the primary end-user of the semiconductor fabrication market due to the steady adoption of fabless business model. The market will witness increasing demand for devices such as memory, logic, discrete, analog, sensor, and opto devices. Subsequently, the vendors must ensure and enhance their equipment quality to cater to the growing demand.

APAC will be the major revenue contributor to the semiconductor fabrication market owing to the large number of semiconductor foundries located in China, Taiwan, South Korea, and Japan. The construction of fabs and steady adoption of fabless business model will further supplement the growth of the semiconductor wafer polishing equipment market in APAC.

The worldwide market for Semiconductor Wafer Polishing Equipments is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
