Abstracts

The global Sensor Matching Magnet market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Sensor-mate magnets are magnets that are designed for use with one or more magnetic sensor products, usually in combination with some form of overmolding or potting to facilitate mechanical mounting in the end application. While most magnet-based sensor systems can be used with any magnet with suitable characteristics, the advent of matched magnets allows sensor manufacturers to describe the performance of their products in terms of magnets with known characteristics.
