## Abstracts

According to our (Global Info Research) latest study, the global Serial Communication Cable market size was valued at US\$ 548 million in 2024 and is forecast to a readjusted size of USD 748 million by 2031 with a CAGR of 4.1% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Serial communication cable is a special cable used for serial data transmission between devices. It transmits data bit by bit through a single channel and is suitable for low to medium speed, long distance or anti-interference scenarios. Its typical structure includes a shielding layer (anti-electromagnetic interference), twisted pair (reduced crosstalk) and a specific interface (such as RS-232, RS-485, USB serial converter, etc.). It is widely used in industrial automation (PLC communication), instrument control, POS terminals, medical equipment and traditional computer peripheral connections. Compared with parallel cables, it has low cost and simple wiring, but the transmission rate is low and it needs to rely on protocols (such as Modbus) to ensure data integrity.

This report is a detailed and comprehensive analysis for global Serial Communication Cable market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application.
