Abstracts

The global Serum market size is expected to reach \$ 1643 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032).

Serum is the component that is neither a blood cell (serum does not contain white or red blood cells) nor a clotting factor; it is the blood plasma not including the fibrinogens. Serum includes all proteins not used in blood clotting (coagulation) and all the electrolytes, antibodies, antigens, hormones, and any exogenous substances (e.g., drugs and microorganisms).

Market completion is intense. Thermo Fisher (Life-Tech), Sigma-Aldrich, Merck, Corning, Bovogen are the leaders of the industry, with 53% market shares.

North America is the largest consumer and supplier, with a production market share of more than 35%, and a consumption market share of 32%. The second largest production place is South America with the production market share of more than 23%. Europe is the second largest consumption place with the consumption market share of nearly 30%.

This report studies the global Serum production, demand, key manufacturers, and key regions.
