## Abstracts

The global Server Liquid Cooling Pump market size is expected to reach \$ 1183 million by 2032, rising at a market growth of 9.4% CAGR during the forecast period (2026-2032).

A Server Liquid Cooling Pump is a key fluid circulation component used in server-level liquid cooling systems. It delivers coolant to cold plates or microchannel cooling modules attached to CPUs, GPUs, ASICs, memory modules, and other high-heat-density components, and then returns the heated coolant to a heat exchanger, CDU, or rack-level cooling unit. Unlike large facility-side pumps in data centers, server liquid cooling pumps emphasize compact size, low noise, low vibration, high reliability, precise flow control, and leak prevention, making them suitable for AI servers, HPC servers, high-power computing nodes, and edge servers. In 2025, global Server Liquid Cooling Pump production reached approximately 146.5 k units, with an average global market price of around 4200 USD/unit. The production capacity for Server Liquid Cooling Pump in 2025 was approximately 150 k units. The typical gross profit margin for Server Liquid Cooling Pump between 20% and 40%.

The Server Liquid Cooling Pump market is an emerging segment driven by the rapid growth of AI servers, GPU clusters, HPC systems, and high-density data centers. Demand mainly comes from server-level cold plate cooling, rack-level liquid cooling, and secondary-side circulation in CDU-based systems. As rack power density continues to rise, traditional air cooling is increasingly unable to meet the thermal requirements of high-heat-flux chips, making server liquid cooling pumps more important for improving cooling efficiency, reducing PUE, enabling modular maintenance, and ensuring system reliability. Future market growth will be driven by AI computing expansion, higher penetration of liquid-cooled servers, stricter data center energy efficiency requirements,

and upgrades toward compact, intelligent, low-leakage, and redundant pump designs.

This report studies the global Server Liquid Cooling Pump production, demand, key manufacturers, and key regions.
