Abstracts

According to our (Global Info Research) latest study, the global Service Resource Planning (SRP) market size was valued at USD 528.9 million in 2022 and is forecast to a readjusted size of USD 781.8 million by 2029 with a CAGR of 5.7% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

SRP provides the systems basis for initiation, planning, resource management, execution, close and control of projects and services. An SRP solution combines the best elements of previous standalone business applications for accounting (ERP), client relationship management (CRM) and professional services automation (PSA) to support the entire bid-to-bill lifecycle of project- and service-driven organizations.

Combining the best of CRM, PSA and ERP applications, Service Resource Planning (SRP) is a strategic planning tool for executives to gain an understanding of current and future business operations. The integration of these core applications provides the systems background for visibility and control of all aspects of the business.

This report is a detailed and comprehensive analysis for global Service Resource Planning (SRP) market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2023, are provided.

Key Features:
