According to our (Global Info Research) latest study, the global Servo Motors and Drives market size was valued at US\$ 17810 million in 2025 and is forecast to a readjusted size of US\$ 24340 million by 2032 with a CAGR of 4.6% during review period.

A servo motor is a rotary actuator that allows for precise control of angular position. Servo motors are utilized in industrial machine tools, CNC manufacturing machines and processes, and packaging applications. Electronic Equipment utilize servo motors because of their smooth commutation and accurate positioning. The aerospace industry makes use of servo motors in their hydraulic systems to contain system hydraulic fluid. Servo Drives, sometimes called servo amplifiers, are devices that have the ability to take a low power command signal from a motion controller and turn it into high power current/voltage. This is then applied to servo motor windings in order to produce torque.

The core manufacturers of global Servo Motors and Drives include Yaskawa, Mitsubishi, Fanuc, Siemens, etc. The top four players account for about 34% of the global market share. Asia-Pacific is the largest market globally, with a market share of about 52%, followed by Europe and North America, with a market share of about 22% and 20%, respectively. In term of application, Machinery-related Industries are the largest downstream sector, accounting for about 39%.
