SF6 Density Monitor is an instrument specifically designed to monitor and measure the density of sulfur hexafluoride (SF6) gas, which is widely used in power equipment such as gas insulated switchgear (GIS). The device ensures that the equipment operates within a safe and efficient operating range by monitoring the density changes of the gas. SF6 gas is widely used due to its excellent electrical insulation and arc extinguishing properties, so accurate monitoring of its density is essential to ensure the safety and reliability of the power system.
