## Abstracts

The global SF6-free MV Switchgear market size is expected to reach \$ 869.8 million by 2030, rising at a market growth of 12.1% CAGR during the forecast period (2024-2030).

The EU's F-gas regulation, which outlines key dates for the prohibition of SF6 in medium voltage (MV) electrical equipment, including new installations of SF6 gas insulated switchgear (GIS), aims to reduce potent and harmful greenhouse gas emissions, including Sulfur Hexafluoride (SF6), by two-thirds by 2030 compared to 2014 levels. The 2022 proposal outlines important new proposed regulations designed to phase out the use of SF6 – an established but environmentally harmful insulating gas which is 25,200 times more potent than CO2. This has been made possible with the development of SF6 alternatives paving the way for this level of regulation.

This report studies the global SF6-free MV Switchgear production, demand, key manufacturers, and key regions.
