## Abstracts

The global Shaftless Rim Driven Thruster market size is expected to reach \$ 560 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

The shaftless rim driven thruster adopts advanced propeller integration coupling technology, which integrates the motor rotor, propeller, bearings and guide vanes into one body. The motor torque directly acts on the tip of the propeller to drive the propeller to rotate. It has the advantages of small size, high power density and easy installation. Compared with traditional propellers, it has the advantages of high efficiency, taking up less cabin space, low noise and low vibration.

The upstream core lies in high-performance materials and precision components, including high-energy-density permanent magnet materials, ultra-thin composite materials resistant to seawater corrosion, ceramic bearings, and core power drive modules.

Global sales are projected to be approximately 144,000 units in 2025, with market prices ranging from \$1,200 to \$5,500. The industry's gross profit margin is in the range of 25% to 40%.

The shaftless rim-driven thruster, with its design integrating the motor stator with the duct and the rotor with the propeller blades, completely eliminates the mechanical friction and space constraints associated with traditional shaft systems. It is hailed as the 'ultimate solution' for creating ultra-quiet, highly maneuverable next-generation underwater vehicles and high-end vessels.

The rapid development of this industry is primarily driven by two core factors. The first is

the global transition to green shipping, with increasingly stringent environmental regulations and green development goals for inland waterway vessels creating a strong policy environment for pure electric, zero-emission propulsion technology. Secondly, shaftless rim-driven thrusters demonstrate broad applicability in both military and civilian markets.

This report studies the global Shaftless Rim Driven Thruster production, demand, key manufacturers, and key regions.
