Abstracts

The global Shared Hosting Service market size is expected to reach \$ 7050 million by 2032, rising at a market growth of 6.4% CAGR during the forecast period (2026-2032).

Shared hosting services are basic website hosting services aimed at individual website owners, SMEs, developers, small organizations, and entry-level e-commerce users. They are typically provided by professional hosting providers, domain registrars, cloud service providers, or Web Presence platforms, based on servers, data centers, operating systems, web service software, databases, and control panels. Typical product forms include Linux shared hosting, Windows shared hosting, cPanel hosting, Plesk hosting, cloud virtual hosting, entry-level WordPress hosting, enterprise website hosting, and hosting space packages. Its technical characteristics include multiple customers or multiple websites sharing the same physical server or the same hosting resource pool's CPU, memory, storage, bandwidth, IP, database, and email system. The service provider uniformly provides server maintenance, system updates, security protection, backup, SSL, script installation, database management, domain binding, website migration, and technical support.

From a demand structure perspective, the core demand for shared hosting still comes from website scenarios with low budgets, low technical barriers, and low to medium traffic, including personal blogs, SME websites, association/organization websites, showcase-style foreign trade websites, small WooCommerce stores, landing pages, and startup project pages. Industry growth no longer primarily stems from traditional 'web space' itself, but rather from hosting providers bundling products and increasing average order value around WordPress, AI website building, automatic migration, website security, backup, CDN, email, domains, and e-commerce plugins. Meanwhile, cloud servers, lightweight application servers, managed WordPress, no-code website

building, and e-commerce SaaS are diverting new customers, resulting in relatively moderate growth for shared hosting in mature markets, while remaining resilient in emerging markets and among price-sensitive customers.

This report studies the global Shared Hosting Service demand, key companies, and key regions.
