Abstracts

According to our (Global Info Research) latest study, the global Shoe Press market size was valued at US\$ 198 million in 2025 and is forecast to a readjusted size of US\$ 278 million by 2032 with a CAGR of 5.1% during review period.

In 2025, global Shoe Press production reached approximately 48 units, with an average global market price of around US\$4 million per unit. Shoe press is an innovative solution used in the press section of paper paper-making process for efficient dewatering. It is used in the paper machine during the pressing section before it enters the drying stage. Unlike conventional press systems that use a rotating cylinder, the shoe press paper machine uses an extended nip with a flexible belt, allowing for a larger pressing area. This enhances the dewatering process, leading to higher efficiency, better sheet quality, and energy savings.

The shoe press market is driven by two tracks: new-build line integration and, more importantly, rebuild demand for existing paper machines. Buyers tend to prioritize dewatering efficiency, lower steam and total energy use, better sheet strength, stable runnability, and higher finished-product quality. As decarbonization and operating-cost reduction move higher on the agenda of paper producers, purchasing decisions are increasingly shaped by unit energy consumption, maintenance simplicity, footprint constraints, and line-level compatibility rather than by machine specifications alone. The segment also has a relatively high technical threshold, so supplier choice depends heavily on operating experience, delivery capability, and life-cycle support. Competition is therefore shifting from one-time equipment supply toward continuous optimization, fast retrofit execution, and operating assurance. New installations are mainly tied to capacity expansion and shifts toward higher-value grades, while upgrades of installed machines provide the more stable order base. In that sense, the market is best

understood as concentrated, service-intensive, and retrofit-led. Compact solutions are especially important for high-speed lines and space-constrained rebuilds, which means the real competition is not only about performance, but also about engineering fit with existing production lines.

This report is a detailed and comprehensive analysis for global Shoe Press market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Shoe Press market size and forecasts, in consumption value (\$ Million), sales quantity (Units), and average selling prices (K US\$/Unit), 2021-2032

Global Shoe Press market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Units), and average selling prices (K US\$/Unit), 2021-2032

Global Shoe Press market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Units), and average selling prices (K US\$/Unit), 2021-2032

Global Shoe Press market shares of main players, shipments in revenue (\$ Million), sales quantity (Units), and ASP (K US\$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Shoe Press

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Shoe Press market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Voith, Valmet, Andritz, Bellmer, Allimand, A.Celli, PAPCEL, Parason, Zibo Taiding, Henan Dazhi, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Shoe Press market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

Operating Pressure 1300kN/m

Market segment by Operating Speed

Operating Speed

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Shoe Press Consumption Value by Type: 2021 Versus 2025 Versus 2032

1.3.2 Operating Pressure 1300kN/m

1.4 Market Analysis by Operating Speed

1.4.1 Overview: Global Shoe Press Consumption Value by Operating Speed: 2021 Versus 2025 Versus 2032

1.4.2 Operating Speed
