Short-acting Nicotine Replacement Therapy (NRT) products are fast-acting treatments designed to help people manage sudden cravings and withdrawal symptoms during smoking cessation. These products, which include nicotine gum, lozenges, nasal sprays, and oral inhalers, deliver nicotine quickly into the bloodstream to provide immediate relief. Unlike long-acting NRTs like patches, short-acting forms can be used as needed throughout the day, offering more flexible and responsive support during the quitting process. They are often used in combination with other NRTs for more effective smoking cessation.
