A short-drama digital content production platform refers to an online platform that provides integrated services for short-drama film and television content, from scriptwriting, character generation, video production, post-production editing to distribution and operation, based on digital technology, artificial intelligence tools, and content creation management systems. These platforms typically reduce short-drama production costs and improve content production efficiency through algorithm-assisted creation, virtual character technology, and automated video generation technology. They are widely used in online short video platforms, film and television content platforms, and the digital entertainment industry, and are a crucial creative infrastructure in the digital content industry.

The upstream of the short-drama digital content production platform industry chain mainly includes digital content material suppliers, AI algorithm and model providers, film and television copyright material libraries, and cloud computing and digital infrastructure vendors, providing technical and material support for content production. The midstream consists of short-drama digital content production platform operators, who rely on AI video generation technology, digital human technology, and content creation tools to provide scriptwriting, video generation, post-production, and content distribution and operation services, representing the core value creation link in the industry chain. The downstream primarily targets short video platforms, film and television content

platforms, advertising and marketing companies, and individual content creators for entertainment content dissemination and commercial monetization. In terms of profitability, this industry belongs to the high-tech value-added content service industry, with gross profit margins typically ranging from 45% to 75%. Among them, companies with self-developed AI content generation technology and platform traffic operation capabilities have higher gross profit margins, exceeding 70%, while companies that mainly outsource content production or deliver services have relatively lower gross profit margins, typically around 45% to 55%.

The short drama digital content production platform provides creators with a stage for creative expression and content sharing, promoting the creation, dissemination and interaction of digital video content. Through these platforms, creators can transform their ideas and stories into wonderful short drama works, share their creativity with global audiences, and realize the display and recognition of their personal values. At the same time, audiences can also discover high-quality short drama content of various styles and types on these platforms, enrich their audio-visual experience, narrow the distance between creators, and jointly build a digital content ecosystem full of creativity and diversity.
