The global Shower Toilet and Electronic Shower Toilet Seat market size is expected to reach \$ 20322 million by 2032, rising at a market growth of 9.0% CAGR during the forecast period (2026-2032).

A shower toilet, also known as a bidet toilet, is a modern toilet system that combines the functionalities of a traditional toilet with a bidet, offering a built-in water spray feature for personal hygiene. It uses a nozzle to wash the user after using the toilet, enhancing cleanliness and reducing the need for toilet paper. An electronic shower toilet seat, on the other hand, is a detachable seat that can be added to an existing toilet, featuring advanced controls for water temperature, pressure, and sometimes additional functions like drying, deodorizing, and seat warming for improved comfort and hygiene. In 2025, global Shower Toilet and Electronic Shower Toilet Seat production reached approximately 33.93 million units and price is about 320 USD/Unit. The average gross profit margin of this product is 30%.

The market for shower toilets and electronic shower toilet seats is driven by increasing demand for enhanced personal hygiene, especially in regions with rising awareness of the health benefits associated with bidet functions. The growing elderly population and people with mobility issues also favor these products, as they offer ease of use and added comfort. Additionally, advancements in smart home technology and an increasing focus on luxury bathroom experiences are encouraging more consumers to invest in high-tech toilet solutions.

However, the market faces challenges, including the high initial cost of these products, which may limit their adoption, especially in price-sensitive markets. Installation requirements and the need for electrical connections can also be a barrier for

consumers in older homes that may not be equipped for such upgrades. Furthermore, cultural preferences and habits in certain regions where traditional toilet use is more prevalent can slow the market growth for shower toilets and electronic toilet seats.

This report studies the global Shower Toilet and Electronic Shower Toilet Seat production, demand, key manufacturers, and key regions.
