According to our (Global Info Research) latest study, the global Shrimp Disease Diagnostics market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

As disease diagnosis and subsequent treatment continue being the key cornerstones in aquaculture, seafood farmers are more than keen on integrating state-of-the-art improvements into their health management paradigms. Disease management has always been a bright spot in aquaculture, as intensively cultured seafood products remain naturally susceptible to viral infections. As 'disease-free' certifications started making their way to the prominent requisites for successful transactions in the shrimp landscape, adoption of effective diagnostics became highly imperative for shrimp suppliers to ensure product integrity.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high costs of research and development, and patent expirations. Companies need to continuously innovate and adapt to these challenges to stay competitive in the market and ensure their products reach patients in need. Additionally, the COVID-19 pandemic

has highlighted the importance of vaccine development and supply chain management, further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.
