Abstracts

The global Shrink Disc market size is expected to reach \$ 320 million by 2029, rising at a market growth of 4.2% CAGR during the forecast period (2023-2029).

Global key players of shrink disc include St?we, RINGFEDER, RINGSPANN, Fenner Precision Polymers (Michelin), TAS-Sch?fer, etc. The top five players hold a share over 20%. Europe is the largest producer, has a share about 47%, followed by North America, with share 21%. Asia-Pacific is the largest market, has a share about 50%, followed by Europe, and North America, with share 28% and 16%, separately.

The shrink discs are external locking devices installed over hub projections. By tightening the locking screws, the locking collars exert radial forces on the tapered ring and on the hub. After bridging the fit clearances, radial clamping pressure is generated between shaft and hub establishing a solid, frictional connection.
