Abstracts

According to our (Global Info Research) latest study, the global SiC Ion Implanters market size was valued at US$ 61.7 million in 2023 and is forecast to a readjusted size of USD 114 million by 2030 with a CAGR of 9.4% during review period.

For silicon carbide, in the doping process, the use of ion implantation can achieve better results than high-temperature diffusion.

The ion implantation machine used for silicon carbide wafers is generally a high-temperature and high-energy type, with high equipment costs and long equipment delivery time. Globally, there are not many companies that can provide SiC ion implantation machines. The current leader is mainly Axcelis, whose Purion XE series high-energy equipment can meet the requirements of 150mm and 200mm SiC wafers.
