Abstracts

The global SiC Rectifiers market size is expected to reach \$ 2324.8 million by 2029, rising at a market growth of 26.1% CAGR during the forecast period (2023-2029).

The key players of SiC diodes (SiC SBD) are STMicroelectronics, Infineon, Wolfspeed, Rohm, onsemi, Microchip (Microsemi), and San'an Optoelectronics, etc. The top five players hold a share over 70 percent.

Silicon Carbide schottky diodes have the advantage of silicon carbide compound's superior physical characteristics over Si, with 4 times better dynamic characteristics and 15% less forward voltage. They have the lowest reverse recovery time (trr) compared to the various types of fast recovery, ultrafast recovery, and super-fast recovery diodes. They also have the lowest forward voltage drop (VF). Silicon carbide is a compound semiconductor with more high level power characteristics than silicon, including a bandgap approximately three times greater, a dielectric breakdown field 10 times higher, and a thermal coefficient three times larger.

This report studies the global SiC Rectifiers production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for SiC Rectifiers, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
