## Abstracts

The global Side Indicator Light market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The steering indicator has two different functions. One of them is the change of display direction. When the driver turns on the turn signal, the turn signal indicator on the corresponding side starts to flash. When the operation is completed, the flash will stop automatically. Another function of the turn indicator is to warn the hazard in the hazard light system. In this case, all turn signal lights flash at the same time to warn other road users of the danger. For example, if you stop suddenly or your car causes traffic obstruction.
