Wallboard is mainly a kind of dado or decorative wallboard made according to the needs of the wall. At present, the wall panels on the market are mainly solid wood panels, medium density boards and ceramic tiles. General wooden boards are not durable, high quality wooden boards are too expensive, porcelain boards are too heavy, inconvenient to transport, fragile, and difficult to install, and the MDF has many advantages in performance due to the combination of various raw materials and technologies. However, due to the different raw materials and technologies of the products, the quality of the products is also different, so consumers need to choose carefully.
