According to our (Global Info Research) latest study, the global Siding market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Siding or wall cladding is the protective material attached to the exterior side of a wall of a house or other building. Along with the roof, it forms the first line of defense against the elements, most importantly sun, rain/snow, heat and cold, thus creating a stable, more comfortable environment on the interior side. The siding material and style also can enhance or detract from the building's beauty. There is a wide and expanding variety of materials to side with, both natural and artificial, each with its own benefits and drawbacks. Masonry walls as such do not require siding, but any wall can be sided. Walls that are internally framed, whether with wood, or steel I-beams, however, must always be sided.

The major players in Europe Siding market include Kingspan, Etex Group, Ruukki, etc. The top 3 players occupy about 10% shares of the Europe market. Germany and France are main markets, they occupy about 40% of the whole market. Wood Siding is the main type, with a share about 50%. Commercial Building is the main application, which holds a share about 50%.
