According to our (Global Info Research) latest study, the global Signal Jammer market size was valued at US\$ 866 million in 2025 and is forecast to a readjusted size of US\$ 1056 million by 2032 with a CAGR of 2.9% during review period.

A signal jammer is a kind of device which blocks reception or transmission of signals. Signal jammers have both malicious and benign uses. Military and the police often use them for the purpose of limiting or disrupting communications during the hostage situation, during bomb threats or when the military action is ongoing. The jammer can cut off all wireless communication system equipment, as long as it is in a certain wireless frequency within the rate range (for example: within its specific radius). It transmits radio frequency waves to prevent specific communication equipment from establishing or maintaining connection communication.

Global core signal jammer manufacturers include Raytheon, L3Harris Technologies etc. The top 3 companies hold a share about 40%. North America is the largest market, with a share about 35%, followed by Asia Pacific and Europe with the share about 30% and 25%. In terms of product, multi band/ channel signal jammer is the largest segment, with a share over 95%. And in terms of application, the largest application is educational institution, followed by government and law enforcement agencies.
