The growth of animal husbandry, the increase in feed grain prices, and the increasing use of organic farming by farmers due to increasing consumer health concerns are expected to drive the market for silage inoculation reagents. The silage inoculant market segment is expected to have the largest share of the inoculant market in the future. The silage inoculant market segment has the largest share in the inoculant market. Sales of silage inoculation reagents have increased due to the development of cross-region animal husbandry in emerging countries. Urbanization has increased sales of animal-based products such as milk, eggs and meat. As the price of feed grains rises, agricultural inocula can be a suitable alternative.
