According to our (Global Info Research) latest study, the global Silanediol Salicylate market size was valued at US\$ 10.97 million in 2025 and is forecast to a readjusted size of US\$ 15.23 million by 2032 with a CAGR of 4.8% during review period.

In 2025, global sales volume of Silanediol Salicylate is estimated at approximately 36 tons, with the mainstream ex-works price at around USD 296/kg. Gross margin of major manufacturers is approximately 45%-65%.

Silanediol Salicylate (DSBC), CAS No. 187939-06-6, is an organosilicon salicylate cosmetic active ingredient. Its molecular structure contains both salicylate groups and silanediol structures. Compared with ordinary salicylic acid, DSBC is positioned more as a mild skin-conditioning ingredient rather than a typical strong exfoliating acid. It is mainly used in cosmetic formulations for soothing repair, oil-control conditioning, anti-aging care, and scalp care.

The product is usually supplied as a cosmetic active solution, branded active ingredient, or compound functional ingredient, with good formulation compatibility. It can be used in serum, lotion, cream, facial mask, scalp essence, shampoo and hair care product, and body care product. Its core value lies in combining the skin-conditioning properties of the salicylate structure with the skin affinity and formulation mildness brought by the silanediol structure, helping improve skin condition, regulate sebum, relieve discomfort, and enhance the differentiation of functional skincare and scalp care formulations.
