Abstracts

Silicon Metal is known as a semi-metallic or metalloid, having several of the characteristics of metal. It is the second most abundant element in the Earth's crust after oxygen, naturally occurring in various forms of silicon dioxide or silicates and very rarely in its pure form in volcanic exhalations.

Scope of the Report:

This report focuses on the Silicon Metal in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The downstream industries of silicon metal products are aluminum industry, silicone compounds, photovoltaic solar cells and electronic semiconductors. In the recent years, with the limitations of government policy and sluggish economy, the consumption growth of silicon metal slowing down obviously.
