According to our (Global Info Research) latest study, the global Silicon Tapes market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Silicon tapes are the non-tacky, self-amalgamating type tape. Basically it is produced from the cured silicon rubber which provides extended life and durability in its end use as a shielding tape. Further, silicone tapes are also known as self-vulcanizing, or silicone gel tapes. When silicon tape wrapped the around the pipes, electrical wire hoses and others it forms a waterproof, rubber, electrically insulated coating. It also resists the heat, moisture, sunlight, acid and other solvent. It has as wide application such as wire harnessing, vibration reduction, plumbing repairs, grip applications to tools, damaged wiring repairs, emergency repairs, wrapping purposes seal, electrical connections in various sector.

Demand of the silicon tape across the world has been at the rapid pace as the number of uses rising in the electrical and medical field as well. Silicon medical tapes help in abating the amount of skin damage caused by tape removal and dressing removal. Moreover, rising demand of the silicon tape in the chemical industry is anticipated to drive the growth of the silicon tape market. It uses for the gas leakage, electrical insulation, corrosion preventing weatherproofing, transmission and storage stages and others. With rising development of the chemical industries in the developed countries is expected to propel the growth of the silicon tapes market in the upcoming years. Further, it is also used for wrapping purpose and sector identification in many fields. Due to good resistive properties it finds several applications in others sectors. Research activities in enhancing the properties of silicon tape to make more resistive at extreme condition is expected to positively impact the growth of the market. These market

activities are believed to open a gateway of opportunities for the companies entering into the business of silicon tape market.
