Abstracts

The source of the Reclaimed Wafers comes from the monitor wafers and the dummy wafers but not the defect wafers in the semiconductor fab. The Reclaimed Silicon Wafer is closely related to the test piece. The purpose of the regenerated wafer is to recycle the test piece. After secondary processing, the wafer surface is restored to the original state mainly through etching, grinding, chemical mechanical polishing and cleaning. state, and then put it into the wafer manufacturing process to achieve the purpose of reuse.
