Silicone Coated Fiberglass Fabric, also referred to in the Chinese market as silicone-titanium fireproof fabric, is a functional fire-resistant textile made from standard fiberglass fabric, high-silica fiberglass fabric, or quartz glass fiber fabric as the base material, treated with single-sided or double-sided silicone, silicone rubber, or modified high-temperature-resistant coatings. The product is not actually made from metallic silicon-titanium alloy, but is a trade name commonly used in China's fireproof fabric and flexible connector markets. It generally features flame retardancy, high temperature resistance, waterproof performance, corrosion resistance, aging resistance, tear resistance, and good flexibility. It is mainly used to provide thermal insulation, fire protection, and flexible connection functions in environments involving high temperature, flame, hot air, smoke, or corrosive media.

The upstream of Silicone Coated Fiberglass Fabric mainly includes fiberglass fabric, high-silica fiberglass fabric, quartz glass fiber fabric, silicone rubber, silicone resin, flame-retardant additives, pigments and fillers, coating equipment, drying and vulcanization equipment, and slitting and sewing equipment. The midstream consists of

fireproof material and coated composite fabric manufacturers engaged in base fabric treatment, coating, drying, vulcanization, slitting, sewing, and finished product processing. The downstream applications mainly include building HVAC, industrial manufacturing, energy and chemical, transportation, public safety, and other fields.
