Silicone Edge Graphics (SEG) frames are a type of framing system used for displaying fabric graphics in a clean, professional way. The frames feature a channel around the perimeter where a silicone beaded edge is sewn into the fabric, allowing the graphic to be easily inserted and stretched taut for a smooth, wrinkle-free appearance. This system is commonly used for large-format displays, trade show booths, retail signage, and other visual marketing applications due to its sleek, modern look and quick setup. SEG frames can be backlit, adding extra visual impact by illuminating the fabric from behind.
