Abstracts

The global Silicone Gasket-Free Sealant market size is expected to reach \$ 110 million by 2032, rising at a market growth of 3.0% CAGR during the forecast period (2026-2032).

In 2025, global production of silicone gasket-free sealants reached 33,264 tons, with an average selling price of US\$2,500 per ton. Global annual production capacity for silicone gasket-free sealants was approximately 60,000 tons, with a gross profit margin of approximately 24.5%. Silicone gasket-free sealants are high-performance sealing materials, primarily made of silicone polymers, and possess excellent high-temperature resistance, corrosion resistance, and aging resistance. A key characteristic of this sealant is its ability to achieve a good seal without a gasket, making it widely used in industries such as machinery, automotive, and construction. The upstream of silicone gasket-free sealants includes ferrite powder, soft magnetic metal powder, and enameled wire. The midstream consists of silicone gasket-free sealant manufacturers, while the downstream primarily comprises the automotive, construction, and machinery industries.

The silicone gasket-free sealant market is experiencing rapid growth, with demand continuing to increase. In the construction sector, the widespread adoption of green and prefabricated buildings has significantly increased the demand for high-performance, environmentally friendly silicone gasket-free sealants, primarily used in curtain wall sealing and window/door installation. In the automotive, electronics, and new energy industries, silicone gasket-free sealants, due to their excellent weather resistance, high and low temperature resistance, adhesion, and sealing performance, are widely used for sealing critical components such as automotive engines, battery packs, and photovoltaic modules, becoming an important material to replace traditional gaskets. On

the supply side, there are numerous domestic companies, but the high-end market still relies somewhat on imported brands, while the mid-to-low-end market is highly competitive with significant price fluctuations. Overall, the silicone gasket-free sealant market has broad prospects and will develop towards greener, smarter, and higher-performance directions in the future.
